QuantivFX

# Session Box

Asia, London and New York session ranges with breakout arrows.

Indicator · MetaTrader 5 · version 2.00 · User Guide

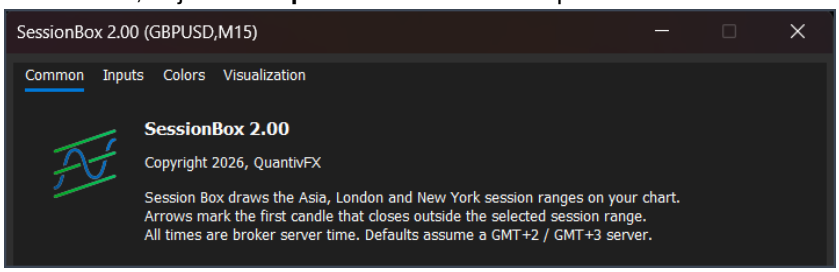

Session Box draws the trading range of up to three sessions on your chart and marks the first candle that closes outside the range of the session you choose. It is free.

Session Box on GBPUSD M15: Asia (blue), London (green), New York (brown) with breakout arrows

## Installation

1. In MetaTrader 5 open **File > Open Data Folder**.
2. Copy the **.ex5** file into `MQL5\Indicators` (or install it from the MQL5 Market, which does this for you).
3. In the **Navigator** window right-click **Indicators** > **Refresh**.
4. Drag the indicator onto a chart, adjust the **Inputs** tab if needed and press **OK**.

The indicator window after you drag Session Box onto a chart

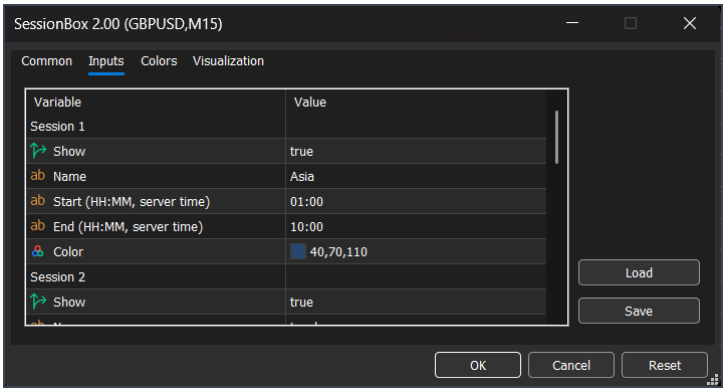

## Reading the chart

Close-up: each label shows the session name and its range in pips; the red arrow marks the first close below the Asia range

- **Box** — high and low of the session. Overlapping sessions (London and New York) blend.
- **Label** — session name and its range in pips.
- **Arrow** — first **closed** candle above (blue, up) or below (red, down) the range of the breakout session, before that session starts again the next day.
- Boxes are drawn on timeframes below D1 and update on every new candle.

## Settings

The Inputs tab

| Setting | Default | What it does |
|---|---|---|
| Session 1 / 2 / 3: Show | true | Turn each session on or off |
| Name | Asia / London / New York | Label text |
| Start / End (HH:MM) | 01:00–10:00, 10:00–18:00, 15:00–23:00 | Session times in **broker server time** |
| Color | blue / green / brown | Box colour |
| Days to show | 10 | How many days of boxes to draw |
| Fill boxes | true | Filled or outline boxes |
| Show session name and range | true | Labels on/off |
| Breakout arrows for | Session 1 | Which session the arrows use, or Off |
| Popup alert / Push / Email | false | Notify when a breakout arrow appears |

**Server time:** the defaults suit brokers on GMT+2 / GMT+3, the most common setting. Check your broker's time in Market Watch and shift the start and end times if your broker uses another offset. Sessions that cross midnight (e.g. 22:00–06:00) are supported.
